spelling system" of his own invention; but much English grammar, for much of the century after Bullokar's effort, was written in Latin, especially by authors who were aiming to be scholarly. John Wallis's Grammatica Linguae Anglicanae (1685) was the last English grammar written in Latin. Even as late as the early 19th century, Lindley Murray, the author of one of the most widely used grammars of the day, was having to cite "grammatical authorities" to bolster the claim that grammatical cases in English are different from those in Ancient Greek or Latin. English parts of speech are based on Latin and Greek parts of speech.[40] Some English grammar rules were adopted from Latin, for example John Dryden is thought to have created the rule no sentences can end in a preposition because Latin cannot end sentences in prepositions. The rule of no split infinitives was adopted from Latin because Latin has no split infinitives.[41][42][43] Language portal English usage controversies English prefixes Subject–object–verb ^ a b c Payne, John; Huddleston, Rodney (2002).
