Looking to get Dropbox up and running? Start by downloading, then installing the Dropbox desktop app. Once it's installed on your computer, you can access Dropbox from the icon in your taskbar (Windows) or menu bar (Mac) or the Dropbox folder in File Explorer (Windows) or Finder (Mac). Any changes you make to your files in the Dropbox desktop app are automatically synced everywhere you access your files in Dropbox, including your account on dropbox.com. Learn more about how Dropbox syncs your files. You can access Dropbox from the icon in your taskbar (Windows) or menu bar (Mac) or the Dropbox folder in File Explorer (Windows) or Finder (Mac). How to install the desktop app with admin privileges The Dropbox desktop app requires admin privileges to run with full functionality on your computer. This enables multiple different core features of Dropbox, including: Sync icons that show the sync status of files and folders Right-click context menus for taking quick actions in Dropbox For most users, the desktop app is automatically installed with admin privileges. However, if you didn't install with admin privileges, you can follow the instructions below to do so. Note: If you don't have admin rights on your computer (for example, if you're using a work computer), you may need to ask your IT department for help. If you already have Dropbox installed, uninstall the application. Download the Dropbox desktop app. Open the installer. Do not right-click or command-click Run as an Administrator. Follow the instructions in the installation wizard. If you're asked for an administrative username and password, enter them or contact your administrator to log in. If you're not asked for an administrative username and password, you're already an admin on your computer. Complete the installation and log in to Dropbox. With the Dropbox desktop app, you can save, view, share, and access the files and folders stored in your Dropbox account from your computer. When you download and install the Dropbox desktop app, two things are added to your computer: Open the Dropbox desktop app Once you've installed the Dropbox desktop app, you can open your Dropbox folder in File Explorer (Windows) or Finder (Mac). For an overview of your recent file activity and your sync history, click the Dropbox icon in your taskbar at the bottom of your screen (Windows) or menu bar at the top of your screen (Mac). From here you can also view and manage your preferences, see which version of Dropbox you're running, and manage how much bandwidth the Dropbox app uses on your computer. It's all too easy to fill up your computer's hard drive space with documents, photos, and videos. With Dropbox, you can easily free up hard drive space by storing your files and folders as online-only. Best of all, you still have access to your files without uninstalling programs, deleting files, or lugging around an external hard drive. Find, organize, and protect your work with Dropbox Dash. Now with advanced search for video, images, and team members plus generative AI capabilities across even more connected apps. Save hard drive space, share and edit files, and send for signatures all without the distraction of countless browser tabs. Get desktop app now. Dropbox provides three versions of the MSI installer for different Windows system architecture. To install: 1. Download the correct MSI file based on your Windows architecture: The installer file should be named Dropbox [x.y.z] Enterprise Installer.msi (where [x.y.z] represents the three-digit designation of the latest installer version). 2. To install the Dropbox desktop application on your current computer, run the enterprise installer with: `msiexec /i "Dropbox [x.y.z] Enterprise Installer.msi"` The `/qn` option can be appended to perform a silent install: `msiexec /i "Dropbox [x.y.z] Enterprise Installer.msi" /qn 3`. If you use a managed software solution, you can deploy the client to more than one device by using the silent option. This will install Dropbox on the Program Files (x86) directory and will require new users to log in to their Dropbox accounts and manually set up preferences. Existing users won't be required to log in or configure preferences again.
