\$5 for a 5-Year Warranty; Timex Extends Manufacturer's Coverage The enclosed one-year limited manufacturer's warranty can be extended to an additional four years from the date of purchase for \$5. This offers enhanced protection under the same terms and conditions as the original warranty. Payment options include: - Call 1-800-448-4639 with a valid credit card (AMEX, Discover, Visa or MasterCard) - Mail a check to: Timex Extended Warranty, P.O. Box 1676, Dept. EF, Little Rock, AR 72203 Required information for payment includes name, address, phone number, date of watch purchase, and 5-digit watch model number. Payment must be made within 30 days. Before use, carefully read the booklet to understand your Timex Combination Watch features and the Limited Warranty. This watch includes: - ANALOG (HANDS) PORTION: Hours, Minutes, Seconds - DIGITAL PORTION: Normal Time/Second Time Zone, Alarm/Hourly Chime, Chronograph (Stopwatch), Countdown Timer, Calendar Your Timex watch also features a patented electroluminescent technology, known as INDIGLO night-light. This feature is designed for improved readability in low light and nighttime conditions. According to the manual, this watch is not designed for diving, even if it can withstand significant water pressure (up to 200 meters). Users are advised to rinse their watch with fresh water after exposure to saltwater. Shock-resistance is another feature mentioned, which should be noted on the face or caseback; however, users must still take care when handling the crystal. The manual then delves into various models of Timex watches, providing specifications and product manuals for different types, including digital and analog designs with features like tide trackers, date displays, and chronographs. The user is encouraged to explore these options and familiarize themselves with their watch's unique characteristics. Given article text here [Seiko Quartz Watches](#) To adjust your Timex watch, you need to understand how to set its features such as date and time which are crucial for a quick glance at the current day and month. **### Setting day and date on analog Timex watches** 1. Pull the crown out all the way until it reaches the third position 2. Turn the crown in either direction for 24-hour cycles to set the day 3. Push the crown back into its original position **### To set time** 1. Pull the crown out all the way until it reaches the third position 2. Turn the crown in either direction until you reach the correct hour 3. Push the crown back into its original position To set the day and date on your watch, it's essential to follow certain steps to maintain water resistance and avoid potential damage. When setting the date, avoid doing so between 10 PM and 2 AM as this may affect the date-change mechanism. If your watch is battery-powered, pull out the crown to stop the movement and preserve battery life. For digital Timex watches, like the T80 model, follow these steps: Press the set button, reset the seconds, press the mode button to continue to minutes, hours, month, date, and year. Remember to notice the AM/PM symbol in the top righthand corner to set the hour correctly. Regardless of whether your watch is analog or digital, setting the day and date functions are relatively simple once you understand these steps.
