Link to this page: During my first year in Venice I met an ingenious priest, who had been a tutor in a patrician family, and who was willing to lead my faltering steps through the "Inferno." This part of the "Divine Comedy" I read with a beginner's carefulness, and with a rapture in its beauties, which I will whisper the reader do not appear in every line.The trouble with the beginner at the writing game is the long, dry spells, when there is never an editor's cheque and everything payable is pawned.As a matter of fact, "Thus Spake Zarathustra", though it is unquestionably Nietzsche's opus magnum, is by no means the first of Nietzsche's works that the beginner ought to undertake to read.Pretty well, I think, for a beginner", remarked Mr.This is no story about the young beginner's struggles in London.Here, tossed about by the sea, the beginner feels about as cosy as he would standing on a bull's horns.The king winced under this accidental home-shot, but kept still: he was learning his part; and he was playing it well, too, for a pretty dull beginner. I struck up a diversion.She opened one that had obviously been often turned over, and read a portion in the drawing tone of a beginner; then laughed, and threw it from her.You can tell at a glance the difference between the old hand and the novice; between the case-hardened man who has been used to shift and struggle for years and the poor devil of a beginner striving to hide his misery, and in a constant agony of fear lest he should be found out.I've been rather lucky haven't I, for a beginner? Someone who is just starting at something, or has only recently started. I'm pretty new at learning Japanese, I'm just a beginner. More Noun Definitions (1) Jan is ready for a new challenge. She's recently moved to Colorado and wants to take advantage of the new terrain and start mountain running. Before the move, she'd been working on her fitness for months, but only on the treadmill.She feels excited to start, but also unsure of herself. She's found a meetup group that says it's beginner-friendly, but is still nervous to actually go in case that isn't the reality. People often associate the beginner phase with discomfort, including confusion, self-doubt, frustration over mistakes, and anxiety about meeting new people or being evaluated.However, being a beginner at any experiential pursuit is also uniquely rich. This applies whether you're training for a new career, taking up a skill, or parenting for the first time. Beginners often experience so-called "newbie gains," a period of rapid improvement in the first couple of years of a new practice, before progress continues but becomes harder to achieve.We only get to experience the beginner phase once. It's a snapshot in time that's worth learning to enjoy.Here are five tips for doing that, so you have a better experience of any new endeavor, instead of seeking to rush through it. 1. Don't Try to Be InvisibleBeginners often seek not to stand out. They want to make their newbie mistakes quietly, unnoticed.However, this approach often counteracts actual progress.Social support increases success, for example, when you seek out people you can ask questions of when you're stuck or role models who can help give you a realistic perception of what to expect. When you go under the radar, you cut yourself off from these supports. Value progress more than you value avoiding your newness or mistakes being noticed. As a beginner, you can't avoid asking questions or trying things that will seem silly in retrospect, because you don't yet know what you don't know.2. Enjoy Your Newbie Gains and Preserve the MemoryEarlier I mentioned "newbie gains," the period of rapid progress beginners often experience. Inherent in this idea is that you were worse very recently. We think we'll always remember what being a beginner felt like, but inevitably we don't. Being able to look back on it has value, so preserve it. Keep a few notes. Record a few videos talking about your inner experiences, achievements and struggles. Narrate the journey, if only for future you.Today's struggles become tomorrow's stories. Imagine yourself at a more accomplished stage looking back on where you're at now. In retrospect, you'll be proud of the version of you who muddled through your clueless phase. What feels messy now will feel impressive later. 3. Enjoy the Abundance of Resources Aimed at BeginnersSearch for tips you'll probably get the impression your learning journey is less aesthetic and streamlined than it should be.Effective skill building usually feels clumsy. People like to be efficient, but you usually can't be efficient until after you know how to do something.4. You Might Be a Beginner at This Specific Activity but You're Not a Beginner at Learning Even on Day 1 of trying a new activity, you're not a blank slate. You've got a lot of experience at learning to draw on.For a start, you know what the learning cycle feels like: what it feels like to pass through the various stages. Whatever you're trying now probably isn't the hardest thing you've accomplished. Put this new journey in the context of all those you've completed.Apply your self-knowledge, for example, about self-sabotaging patterns not to repeat, like starting out so enthusiastically and intensely, you burn out. Which learning methods work for you, even if they're challenging? For example, you know testing, evaluation, or time limits help you level up, or you need scenario-based learning to achieve deep understanding. Using personalized methods you've used before can help you link your current learning journey to earlier ones. For example, flashcards, the method of loci (a memory technique where you associate facts with a familiar route or place), or group study sessions with friends might all take you back to college, in a good way. 5. Limit Low-Quality LearningIn the age of abundant well-produced videos on virtually everything, it's tempting to think we can learn well from passively watching slick content. Those resources can help orient us to what we will have to learn, but not actually build our desired deep knowledge, skills, or experience. Learning that feels easy is often a sign that nothing is going into your brain.Low-quality learning can distort our perception of our progress in two opposite ways. It can make us think our knowledge is deeper than it is. Watching charismatic instructors who excel at explanation, or repetitive passive viewing, can make us confuse following along with understanding. Conversely, since we can put a lot of time into passive learning without achieving much, this can lead to wrongly perceiving ourselves as not having the aptitude to achieve deeper understanding.Beyond initial orientation, consider treating videos as mostly entertainment. Watch for fun, but not as a substitute for better methods. Make Your Beginner Experience One You Don't Want to Rush ThroughThe beginner phase for any activity only happens once. Instead of rushing it, treat it as a unique experience. Imagine looking back: How do you want to remember how you met today's challenges? How can you create a narrative that helps you feel proud of yourself now and doesn't demand being manicured or optimized? What do you hope to learn about yourself? Relish the richness of being a beginner instead of wishing your newness away. a person or thing that begins.a person who has begun begun a course of instruction or is learning the fundamentals.a person who is inexperienced; novice.
