Unlock the address bar in the steam client It often happens that we get a link to a game, and want to buy it, but it opens in the browser where we aren't logged in to our account, and we have two options - either log in in the browser and go fetch the phone for steam guard, or search for the game's title in the steam client.
Not long ago, there was a third option - to copy the URL from the browser and paste it into the steam client on the PC. What was wrong with that?

Originally posted by davidb11: To be honest, SAM isn't going to cause any issue with being banned. The only thing it does is make some people on this forum mad at you, and cause problems with Third party achievement sites. Why would people go mad with me cuz i want to lock my achievements to unlock it again while playing ? xD I would understand it if i would unlock achievements i not earn't in game but this is not a thing i want to do ^-^ its just for Lets Plays for Youtube so the archievements will be shown on video ^-^ Because some people have weird ideas and think that ANY cheating even if you cannot possibly affect them is wrong. It's because they lack basic logic. It's not your problem but they will moan about it constantly. They simply don't understand.
