You should test it to confirm. IMPORTANT NOTES! • Always back up saves first • Single-player use recommended. Cheat Features Included: Game Speed - x2 movement speed + many more available - check inside the app Hey everyone! After a lot of testing (and a few crashes ☹️), I'm excited to share this polished Dune: Awakening trainer. You should definitely try my cheats, it lets you control exactly which features to activate, very easy to setup and adjustable. You can adjust the hotkeys and it works just like a trainer but you have more power over which features you want to enable and also has pointers to different game values. You can play the game the way you want to with my tool and I am sure you will enjoy it, do try it. NOTES If no mods and cheats are available, post a request so we can release Dune: Awakening trainer Happy gaming! This trainer tool for Dune: Awakening was posted with ♥️ by me, hope you enjoy and appreciate it. Donate to my Patreon if you are able. You can report bugs/issues or any suggestions you have for the cheat engine table by posting below. I will try to respond and improve upon the cheat. Please reload this page. There was an error while loading. Please reload this page. You can't perform that action at this time. Codes can unlock skins, weapons, and even special items. They are also an excellent way to reward players and attract newcomers. Dune: Awakening is no different. You can gain the upper hand by following our Dune: Awakening classes guide, too, which will help you set your best sand-walking foot forward. But below are all the available Dune: Awakening codes and how to redeem them: To redeem codes in Dune: Awakening, head to the Dune: Awakening Account Manager. Once you've logged into your Steam account, click on the Redeem Key which should be on your left. Type in the code, click continue, and reap the rewards once you return to the game. Each code in Dune: Awakening can only be redeemed once. By entering your details you are agreeing to our terms and conditions and privacy policy. You can unsubscribe at any time. This site is protected by reCAPTCHA and the Google Privacy Policy and Terms of Service apply. Currently, there is only one code available for Dune: Awakening. However, with three DLCs already announced, including one coming out this year, more codes are likely to drop. This code grants players a Frameblade skin option, which, once unlocked, can be selected in the customisation tab in-game. Only applicable to Kindjal knives, the skin adds a jagged desertpunk look to your blade which lets you shank scavengers in style. The skin doesn't have any effect other than aesthetics, but customisation is always a fun perk which could expire at any time. If new codes drop, we'll let you know. Until then, stay hydrated, get mining, and don't let the Sandworms catch you. One of the main ingredients to any MMO's long-term survival is a healthy mix of mods and cheats. Unfortunately, as of yet, Dune: Awakening currently doesn't have either. Conan: Exiles, Funcom's flagship survival game, has stayed kicking for seven years in part due to the community of modders who have set up base in it. For now, though, modifications and cheats are banned in the Dune: Awakening terms and conditions. As a multiplayer game, it makes sense that server-wide mods are currently being held at a distance. While a couple of fan-made mods have cropped up (focused on engine optimisation and skipping the beautiful but repetitive intro cinematic) it is yet unclear how strict Funcom will be in enforcing its rules. So, there's something weird with the worms atm. they can come out of the ground -anywhere- now. I mean, even on mountains. (right next to Anvil and whatever the previous hub was) i was standing inside my base, right next to Anvil's hub. Literally right next to it. same height etc. Worm comes up, eats me and the base, all gone. But then i noticed other players luring worms to other player's bases. And then once its power/etc is down, they can just loot all the crates. So i dont know how Funcom tends to fix all of that. Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. Dune: Cheat Engine.
