

I'm not a bot

Do you need a decoder and other hardware to watch Dstv? It seems like there's a way to do this without the bulky equipment. Multichoice, the parent firm of Dstv, and behind their amazing accumulation of channels are feeling the heat of popular streaming sites like Netflix, Hulu, Showmax and others. The company, through the Dstv Now app, has been allowing customers to stream content through the internet. What this means is that you can watch all your Dstv channels from virtually anywhere. Now, the firm has started integrating the application for other popular platforms like smart TVs and PCs. With Dstv Now for PC, subscribers can stream different shows while they are simultaneously watching on their decoders. Image: twitter.com, @BBNaijaSource: TwitterMultichoice's move to avail its services across different platforms is a breakthrough for many subscribers. This means that the firm has entered the aggressive online streaming stage, looking to maintain and expand its customer base. The company launched the Dstv Now application six years ago as a trouble-first product. That is why it was compatible with the Android and iOS platforms. However, with the advancement of technology, new uses have emerged, forcing the firm to alter business tactics and enter the online streaming space more aggressively. Such services have made it easier to access Dstv channels. It is incredible how Multichoice has revolutionized the television industry. However, recent entrants and popularity of other online streaming sites are threatening to cut a significant share of their customer base. With the launch of their streaming services via the Dstv Now application, they have entered a new market space. Now, they have availed their streaming application for PC owners. The Dstv Now app for PC free download is available for anyone with an active internet connection and a computer. Interestingly, computer owners have an additional advantage when using this streaming service. They can download the content directly to their storage and watch it offline. How do I get the Dstv Now app?The only way that you can install any Dstv Now app for PC free download is via an Android emulator. The application is not compatible with a PC operating system, hence the need for an emulator. There are different emulators for doing this job, but the most popular for its comprehensive functionality is BlueStacks. You can also visit your Windows AppStore or Mac store to download the Android App Player emulator. If you sourced the application from the PC's official store, it would be automatically installed. However, if you downloaded it from a third-party source, you will have to locate it on your PC and install it. Follow all the on-screen instructions until the software successfully installs in your computer. READ ALSO: Multichoice breaks down its KSh 57 billion contribution to Kenya's economy in 5 years To continue with the Dstv Now setup for PC, you ought to open the software and access its interface. The software will take you through a particular set up and customization processes. Locate the Google Play Store on it and search for the Dstv Now apk. The emulator's interface is similar to your smartphone's, and you will follow the usual prompts for installing applications. After installation, open the app drawer for your collection of applications. Click on the Dstv Now app that you have just downloaded and installed to access its interface. Follow all the instructions on the screen to start watching your favourite channels. Image: twitter.com, @DstvNgSource: TwitterDo you want to watch Dstv on Android for free? Good news - there are innovative ways of doing this on your Android phone, and it is through the Dstv Now app. When Multichoice decided to venture into the online streaming world, they started with the smartphone application, which has seen their numbers grow tremendously. With the Dstv Now app, it is now possible to live stream whatever you desire instead of watching it on your satellite decoder. This service offered many individuals great flexibility as they can catch up on their movies, series, documentaries and watch sports. Step 1: Visit Google PlayStoreThe application is available on the official Google Playstore, and you can access it by using the search function. On the search space, write "Dstv Now", and you will get a couple of results including the Supersport TV app. Ensure that you choose the one from Multichoice Support Services (Pty) Ltd Entertainment. After you click the install button, the application starts downloading. Allow the process to complete before checking your app drawer. Step 3: Open the app. Locate the application from your app drawer and click it. After opening it, you will have access to the application's interface. Follow the prompts for registering or logging in to start utilizing the app. This is a critical stage, as it will give you the capability of accessing the application. There are two alternatives: "Register," and "I have Dstv." The second option is for those individuals with an active subscription whereby you will enter all the required details. If you do not possess a decoder or have never registered with Dstv, you will have to enter your details on the "register" platform. The process is the same when you are setting up on an iPhone, but you will visit the Apple Store for the application. You will also click the Dstv Now register button if you are a new member. READ ALSO: Dstv Paybill Number in Kenya How to watch Dstv on your smart TVOne of the most significant breakthroughs for Multichoice is providing their clients with the capability of watching Dstv on their smart TVs. This means that you can easily download the Dstv Now app for Samsung smart TV or any other platform and start enjoying your favourite shows. According to their official website, Dstv Now apps are available for the following television models: Samsung smart TVs (selected models from 2015 onwards) Hisense smart TVs (selected models from 2018 onwards) LG smart TVs (models running webOS 3.0, 3.5 and 4.0) The installation process is straightforward: Connect your television to the internet utilizing an Ethernet cable or WiFi. Go to the application store on your smart TV and search for Dstv Now. If your television is supported, you will locate the application from the results. Click install and wait until the process is over. Once installed and opened, the application will display a code on your television screen. Using your smartphone or computer, visit now.dstv.com/ and sign in to your account. After successfully signing in, visit now.dstv.com/tv and then enter the code shown on your TV. Hit the "sign-in on TV" button. After completing the process, the application will be live on your TV, and you can watch whatever you want. Smart TVs allow Dstv clients to enjoy high definition content on a massive screen. This is a significant improvement from the small smartphone screens that most people are used to. How does Dstv Now app work? Image: instagram.com, @dstv_kenyaSource: InstagramWhen you have the Dstv Now app installed on the available platforms, you can watch your favourite channels live. This way, you will never have to miss anything when you are on the move. Another great feature is that you can download shows to watch offline. The Dstv Explora even allows subscribers to schedule recordings. Does Dstv now work overseas? Unfortunately, the Dstv Now application is geo-restricted, and you can only watch it from your subscribed country. For instance, a client from South Africa that wants to watch using their account overseas will have to spoof their location probably with a Virtual Private Network. READ ALSO: Dstv Compact to air La Liga, EPL matches at no cost How many people can watch Dstv Now simultaneously? Dstv Now allows users to watch different streams at the same time on separate devices. This means that using a single account, you can stream content on a smart TV, tablet, phone, and even a decoder. This is amazing for those families that have children and are looking to make the most from their subscription. Multichoice is continuing its invasion of the online space, and it will be no surprise to find them in the pay streaming business in the future. For now, they are developing their current streaming application to include more platforms. Dstv Now for PC is a gamer changer as it has allowed many the flexibility of watching their favourite shows, in the best quality when they are away for business or pleasure. Subscribe to watch new videos. READ ALSO: No Let Up For Kenyans As New Dstv Prices Take Effect Why The People Complaining About Dstv Price Hike Should Stop Bothering Us GOTV packages, bouquets and prices in Kenya 2020 Source: TUKO.co.ke Kestrel rolls out streaming service Dstv continues to roll out the game-changing products, services and channels announced at the 2020 Dstv Showcase. The latest new product to go live is the highly anticipated Dstv Streaming service. Dstv is one of the most prominent satellite TV providers in the Sub-Saharan African region. If you're a Dstv subscriber, you can enjoy your favourite shows, movies, and sports events on devices other than the set-top decoder box, including your internet-connected Smart TV - and at no extra cost! Chances are you've been looking for a way to use Dstv on Smart TV. Well, you're here now, so look no further! This comprehensive guide will walk you through the steps to get Dstv's streamer app up and running on your Smart TV, whether it's Hisense, LG, Samsung, or other streaming media player. How to Watch Dstv on Smart TV (Step-by-Step Guide) Step 1: Connect Your Smart TV to the Internet Before you can start watching your favourite TV shows, live sports, or breaking news with the Dstv app on your Smart TV, you must ensure its access to the internet. Connect your TV to the home Wi-Fi network or an Ethernet cable to hook it directly to your network router. Connecting your TV to
the internet varies depending on the Smart TV platform. Refer to your TV's user manual or run a quick search on the web for step-by-step instructions. The good news is that you can stream Dstv on any broadband internet connection as long as the minimum speed is 4 Mb/s. However, we recommend a 10 Mb/s or faster line for the best viewing experience. Having an unmetered connection is also preferable to avoid costly data bills. As for how much data Dstv consumes, you're looking at up to 1.5 MB/minute and 40 MB/minute when streaming catch-up and live TV in SD and HD resolution, respectively. Step 2: Download Dstv on Your Smart TV Once your Smart TV has internet access, the next step is downloading the Dstv app, formerly known as Dstv Now. One can typically do this by going to your TV's app store and searching for "Dstv". Once you've found it, select the app and install it on your TV. The Dstv app is available on several Smart TV devices, including: Android TV w/ Chromecast built-in Apple TV (4th Gen or newer) Hisense Smart TV (select 2018 models or newer) LG Smart TV (2016 or later models running webOS 3.0 or above) Samsung Smart TV (select 2015 models or later) Assuming you own any of the following Smart TVs, you're good to go. Simply perform the steps corresponding to your device to download the Dstv app. Android TV Navigate to the Apps menu from your Android TV Home screen. Holding down the Home button on the remote also works. Scroll down and click Google Play Store in your apps list. On some Android TV remotes, you can press the Home button and click Apps. On older webOS versions, you'll need to select LG Content Store. Now explore the Content Store's Entertainment category and choose Dstv. Optionally, go to the Search (magnifying glass icon) menu to search for the "Dstv" app. Click the Install button on the left-hand side of the Dstv app download page. To open Dstv on your LG Smart TV, go back to the dashboard and scroll to the right end of your "App List". By clicking the Edit App List option and selecting Dstv, you'll also be able to move it to the front of the list for easier access. The following instructions apply to 2022 LG TV models running webOS 22. However, the steps should still work if you have a 2021 or older model running webOS 6.0 or earlier. Related: Get Freeview on Smart TV (LG WebOS TV) - Dstv Now Installation and Registration (Video Guide) Samsung Smart TV Press the Home button on your Smart Remote to open the Home screen, then click Apps in the top apps row. Navigate to the Search (magnifying lens) icon in the upper right-hand corner, and type "Dstv" using the on-screen keyboard. Choose Dstv in the search results and hit Install It shouldn't take more than a minute to download. Return to the Home screen and launch Dstv from your apps row. To move it, scroll to the far right in the row and select Edit List, then highlight Dstv and click Move. The above steps are for 2022 Samsung Smart TVs. The process may vary slightly on the older models. Also Read: Watch BT Sport on LG Smart TV Step 3: Log into Dstv on Your Smart TV After installing the Dstv app, you'll need to log in to your Dstv account to start watching. The sign-in method is the same irrespective of your Smart TV platform. Simply perform these steps: Launch the Dstv app on your Smart TV or streaming device. It'll present an alphanumeric code on your TV screen. From your phone, tablet, or computer browser, go to now.dstv.com/tv, enter the displayed code, and click the "Sign in on TV" button. Log in with your Dstv account credentials, which include your email and password. That's how straightforward it is to sign into Dstv on your Smart TV. You can now dive into Dstv's live and on-demand streaming offerings and enjoy your favourite programmes on the big screen. What if I Don't have a Dstv Account? If you don't have a Dstv account or subscription, visit now.dstv.com and click Sign Up, then fill out the registration form with your email and password, set a password, and click the "Create An Account" button. After that, create your Dstv profile. You can have up to five profiles for individual family members per account. Once you're on the homepage, click "Link My Dstv Account" on the top-right corner and follow the on-screen prompts to verify your Dstv connection, which involves entering your smartcard number and the surname of the Dstv account holder. Cast Dstv on Smart TV via Chromecast & AirPlay If you have a Smart TV or streaming media device with Chromecast or AirPlay built-in, you can use the Dstv (Android | iOS) mobile app to cast content to the big screen. The Android app supports streaming via Chromecast, while the iOS app can stream Dstv content to AirPlay and Chromecast-enabled screens. You should see the Cast icon in the in-app player when you play catch-ups, movies, or live channels on the Dstv mobile app. Tap it and choose your compatible Smart TV from the list of discovered devices. You can use your phone or tablet as a remote to control the video playback. Note your TV should be on the same network as the device you're casting from, e.g., your Android phone or iPad. Mirroring your device's screen to your TV over Miracast won't allow streaming from the Dstv app or website due to DRM protection. It's also worth mentioning that users can cast downloaded content via AirPlay from the Dstv iOS app. The same can't be done from either Android or iOS via Chromecast. Dstv on Smart TV: Frequently Asked Questions Q1. What does the Dstv app on Smart TV offer? Dstv (previously known as Dstv Now) is your destination for countless hours of high-quality entertainment, with features such as: Live stream select TV channels, including news and sports Catch up with your favourite TV shows and enjoy a rotating selection of movies Enable PIN-controlled access to create a safe viewing environment for kids The content catalogue on the Dstv app will differ as per your country due to licensing agreements and your subscription package. Even if you don't have a Dstv subscription, the app gives you access to a limited selection of free live channels and on-demand programmes (only in South Africa). Q2. Is the Dstv Smart TV app free to download? Yes - you can download and use the Dstv app on your Smart TV for free, with no hidden costs. However, you must be a Dstv Compact, Compact Plus, Extra, or Premium customer with a linked account and a moderate broadband internet connection. Q3. Can I adjust the video quality in the Dstv app? You can adjust your video quality settings from the Dstv app's Settings menu or within the player. The app allows you to choose between Highest, High, Medium, and Low quality presets. Setting the video quality from the "Maximum Video Quality" option in the Settings will globally apply when streaming from the Dstv app. Doing it within the in-app player will adjust the quality only for the selected content but immediately go back to the default global setting when you stop watching. Q4. How many Smart TVs can I use my Dstv subscription with? You can link up to four devices (including your phone, tablet, and Smart TV) to your Dstv subscription. However, only two devices are allowed to stream simultaneously. Q5. In which countries can I stream Dstv? The Dstv app is available across 47 Sub-Saharan African countries where Dstv provides its satellite television services, including Angola, Burundi, Chad, Ehiopia, Ghana, Kenya, Liberia, Madagascar, Mauritius, Nigeria, Somalia, South Africa, Sudan, Tanzania, Uganda, Zimbabwe, etc. Q6. Can I record shows in the Dstv app? When watching live channels in the Dstv app, you won't be able to record any programming. However, you'll likely find the latest episodes of your favourite shows in the "Catch Up" section. When watching catch-up, you can pause, fast-forward, and rewind like you can on the Dstv decoder box, but not when streaming live TV. Conclusion Dstv on Smart TV provides paying customers complimentary streaming access to catch-ups, live channels with an eight-day TV guide, and more on-demand content - including series, films, documentaries, and kids' programming. We hope this guide was helpful and that you enjoy the Dstv experience on your Smart TV. You can use your phone or tablet as a remote to control the video playback. Note your TV should be on the same network as the device you're casting from, e.g., your Android phone or iPad. Mirroring your device's screen to your TV over Miracast won't allow streaming from the Dstv app or website due to DRM protection. It's also worth mentioning that users can cast downloaded content via AirPlay from the Dstv iOS app. The same can't be done from either Android or iOS via Chromecast. Dstv on Smart TV: Frequently Asked Questions Q1. What does the Dstv app on Smart TV offer? Dstv (previously known as Dstv Now) is your destination for countless hours of high-quality entertainment, with features such as: Live stream select TV channels, including news and sports Catch up with your favourite TV shows and enjoy a rotating selection of movies Enable PIN-controlled access to create a safe viewing environment for kids The content catalogue on the Dstv app will differ as per your country due to licensing agreements and your subscription package. Even if you don't have a Dstv subscription, the app gives you access to a limited selection of free live channels and on-demand programmes (only in South Africa). Q2. Is the Dstv Smart TV app free to download? Yes - you can download and use the Dstv app on your Smart TV for free, with no hidden costs. However, you must be a Dstv Compact, Compact Plus, Extra, or Premium customer with a linked account and a moderate broadband internet connection. Q3. Can I adjust the video quality in the Dstv app? You can adjust your video quality settings from the Dstv app's Settings menu or within the player. The app allows you to choose between Highest, High, Medium, and Low quality presets. Setting the video quality from the "Maximum Video Quality" option in the Settings will globally apply when streaming from the Dstv app. Doing it within the in-app player will adjust the quality only for the selected content but immediately go back to the default global setting when you stop watching. Q4. How many Smart TVs can I use my Dstv subscription with? You can link up to four devices (including your phone, tablet, and Smart TV) to your Dstv subscription. However, only two devices are allowed to stream simultaneously. Q5. In which countries can I stream Dstv? The Dstv app is available across 47 Sub-Saharan African countries where Dstv provides its satellite television services, including Angola, Burundi, Chad, Ehiopia, Ghana, Kenya, Liberia, Madagascar, Mauritius, Nigeria, Somalia, South Africa, Sudan, Tanzania, Uganda, Zimbabwe, etc. Q6. Can I record shows in the Dstv app? When watching live channels in the Dstv app, you won't be able to record any programming. However, you'll likely find the latest episodes of your favourite shows in the "Catch Up" section. When watching catch-up, you can pause, fast-forward, and rewind like you can on the Dstv decoder box, but not when streaming live TV. Conclusion Dstv on Smart TV provides paying customers complimentary streaming access to catch-ups, live channels with an eight-day TV guide, and more on-demand content - including series, films, documentaries, and kids' programming. We hope this guide was helpful and that you enjoy the Dstv experience on your Smart TV. Dstv rolls out streaming service Dstv continues to roll out the game-changing products, services and channels announced at the 2020 Dstv Showcase. The latest new product to go live is the highly anticipated Dstv Streaming service. Dstv rolls out streaming service Dstv continues to roll out the game-changing products, services and channels announced at the 2020 Dstv Showcase. The latest new product to go live is the highly anticipated Dstv Streaming service. Dstv is one of the most prominent satellite TV providers in the Sub-Saharan African region. If you're a Dstv subscriber, you can enjoy your favourite shows, movies, and sports events on devices other than the set-top decoder box, including your internet-connected Smart TV - and at no extra cost! Chances are you've been looking for a way to use Dstv on Smart TV. Well, you're here now, so look no further! This comprehensive guide will walk you through the steps to get Dstv's streamer app up and running on your Smart TV, whether it's Hisense, LG, Samsung, or other streaming media player. How to Watch Dstv on Smart TV (Step-by-Step Guide) Step 1: Connect Your Smart TV to the Internet Before you can start watching your favourite TV shows, live sports, or breaking news with the Dstv app on your Smart TV, you must ensure its access to the internet. Connect your TV to the home Wi-Fi network or an Ethernet cable to hook it directly to your network router. Connecting your TV to the internet varies depending on the Smart TV platform. Refer to your TV's user manual or run a quick search on the web for step-by-step instructions. The good news is that you can stream Dstv on any broadband internet connection as long as the minimum speed is 4 Mb/s. However, we recommend a 10 Mb/s or faster line for the best viewing experience. Having an unmetered connection is also preferable to avoid costly data bills. As for how much data Dstv consumes, you're looking at up to 1.5 MB/minute and 40 MB/minute when streaming catch-up and live TV in SD and HD resolution, respectively. Step 2: Download Dstv on Your Smart TV Once your Smart TV has internet access, the next step is downloading the Dstv app, formerly known as Dstv Now. One can typically do this by going to your TV's app store and searching for "Dstv". Once you've found it, select the app and install it on your TV. The Dstv app is available on several Smart TV devices, including: Android TV w/
Chromecast built-in Apple TV (4th Gen or newer) Hisense Smart TV (select 2018 models or newer) LG Smart TV (2016 or later models running webOS 3.0 or above) Samsung Smart TV (select 2015 models or later) Assuming you own any of the following Smart TVs, you're good to go. Simply perform the steps corresponding to your device to download the Dstv app. Android TV Navigate to the Apps menu from your Android TV Home screen. Holding down the Home button on the remote also works. Scroll down and click Google Play Store in your apps list. On some Android TV remotes, you can press the Home button and click Apps. On older webOS versions, you'll need to select LG Content Store. Now explore the Content Store's Entertainment category and choose Dstv. Optionally, go to the Search (magnifying glass icon) menu to search for the "Dstv" app. Click the Install button on the left-hand side of the Dstv app download page. To open Dstv on your LG Smart TV, go back to the dashboard and scroll to the right end of your "App List". By clicking the Edit App List option and selecting Dstv, you'll also be able to move it to the front of the list for easier access. The following instructions apply to 2022 LG TV models running webOS 22. However, the steps should still work if you have a 2021 or older model running webOS 6.0 or earlier. Related: Get Freeview on Smart TV (LG WebOS TV) - Dstv Now Installation and Registration (Video Guide) Samsung Smart TV Press the Home button on your Smart Remote to open the Home screen, then click Apps in the top apps row. Navigate to the Search (magnifying lens) icon in the upper right-hand corner, and type "Dstv" using the on-screen keyboard. Choose Dstv in the search results and hit Install It shouldn't take more than a minute to download. Return to the Home screen and launch Dstv from your apps row. To move it, scroll to the far right in the row and select Edit List, then highlight Dstv and click Move. The above steps are for 2022 Samsung Smart TVs. The process may vary slightly on the older models. Also Read: Watch BT Sport on LG Smart TV Step 3: Log into Dstv on Your Smart TV After installing the Dstv app, you'll need to log in to your Dstv account to start watching. The sign-in method is the same irrespective of your Smart TV platform. Simply perform these steps: Launch the Dstv app on your Smart TV or streaming device. It'll present an alphanumeric code on your TV screen. From your phone, tablet, or computer browser, go to now.dstv.com/tv, enter the displayed code, and click the "Sign in on TV" button. Log in with your Dstv account credentials, which include your email and password. That's how straightforward it is to sign into Dstv on your Smart TV. You can now dive into Dstv's live and on-demand streaming offerings and enjoy your favourite programmes on the big screen. What if I Don't have a Dstv Account? If you don't have a Dstv account or subscription, visit now.dstv.com and click Sign Up, then fill out the registration form with your email and password, set a password, and click the "Create An Account" button. After that, create your Dstv profile. You can have up to five profiles for individual family members per account. Once you're on the homepage, click "Link My Dstv Account" on the top-right corner and follow the on-screen prompts to verify your Dstv connection, which involves entering your smartcard number and the surname of the Dstv account holder. Cast Dstv on Smart TV via Chromecast & AirPlay If you have a Smart TV or streaming media device with Chromecast or AirPlay built-in, you can use the Dstv (Android | iOS) mobile app to cast content to the big screen. The Android app supports streaming via Chromecast, while the iOS app can stream Dstv content to AirPlay and Chromecast-enabled screens. You should see the Cast icon in the in-app player when you play catch-ups, movies, or live channels on the Dstv mobile app. Tap it and choose your compatible Smart TV from the list of discovered devices. You can use your phone or tablet as a remote to control the video playback. Note your TV should be on the same network as the device you're casting from, e.g., your Android phone or iPad. Mirroring your device's screen to your TV over Miracast won't allow streaming from the Dstv app or website due to DRM protection. It's also worth mentioning that users can cast downloaded content via AirPlay from the Dstv iOS app. The same can't be done from either Android or iOS via Chromecast.
