Helps our small business save time and money to create different marketing materials professionally. Thank you. Shaelyn D. I need a good background remover for my work and I've been through them all it feels like. This one is the best by far. It's so easy to use and the results always look amazing. Thank you Pixelcut! Kira H. It's amazingly easy and gives the perfect results for my bags and accessories. It looks like it was done by a professional photographer. Mary J. Changing clothes is annoying, right? And on a photo, it seems even harder or does it? Think again! AI has literally made it into a one click task to change clothes and with realistic results for business or personal use. However what if you need to only change the color and not replace the garment? Meet Pincel Reimagine. It's a tool for making instant edits to an apparel item, with the option to keep the original outlines intact. This significantly saves both time and money because it allows you to easily experiment with new colors, textures or materials for any clothing item, without actual photoshoots. First upload your photo to Pincel Reimagine. Then brush over the clothes (or other area) you wish to apply the color change. Next choose the Keep Outlines mode. This way, only the color changes, but not the design. Finally add a prompt to guide the AI e.g. blue shirt, white dress. NB: just describe what the brushed area should be replaced with in simple terms. Hit generate and wait until the request is completed. Click here to watch a tutorial video. Not quite right? No problem. Try again until its perfect. Once youre happy, download your photo. Never order another Fiverr gig again! Why should you go through the hassle of hiring a retouching artist when Pincel makes it so easy for you? It's faster, much simpler and you get to do it all by yourself instantly. No back and forth and more no waiting days for the results. Its instant gratification at its best with AI. Relax and let AI do the styling! Effortlessly swap the colors of workout clothes for a fresh vibe in seconds. In the fast-paced world of social media and digital marketing, the power of a visually appealing image cannot be overstated anymore. Heres why tweaking the color of clothes in photos is a must-have: Boost E-commerce Sales Show your product in every color without extra photoshoots. More choices, more clicks and more sales. Same photo, different vibe! Transform the mood of your pictures by changing the dress color effortlessly and instant for a completely different outcome. Fashion Fashion bloggers can stand out by showcasing or creating new outfits in multiple hues. You can impress followers with your versatile style. Product Designers AI can help to instantly iterate and preview new product design versions. Social Media Businesses can tailor their posts to fit brand colors or seasonal themes. A green sweater becomes a red one in seconds and perfect for that Christmas campaign. Ad Visuals Refresh your ad visuals without reshooting. This offers a great way to test different color schemes to see what catches the eye. Visual Consistency for Brands Keep your brands aesthetic on point across all visuals. Adjust clothing colors in team photos to match your brand palette. Example of how generative AI might also occasionally add in some new details, which can be easily be removed using the Photo Cleaner. Product Previews Give customers a sneak peek of upcoming color releases by tweaking existing product photos. This can build anticipation with zero cost. Tailored Content Creation Simplified Content creators can easily save time and money. Create diverse content from a single photoshoot by changing outfit colors post-production. Not just clothes easily use Pincel to replace the color of objects or accessories. Thinking of using Photoshop? Brace yourself for installations, 1 hour long YouTube tutorials and also dont forget the costs. Pincel is your hassle-free and online alternative. You can also alter the color of multiple pieces of clothing at the same time. Its more straightforward because it requires no learning and works online. Plus theres a free trial. Experimenting with colors has never been easier or faster. Example of another Pincel apparel tool Virtual AI Try-On. With Pincel AI you achieve much more than just color changes to garments. Heres a list of must-have AI tools for clothing and apparels: So think about all the endless possibilities this opens up in digital fashion you can create consistent AI photos with your own virtual models, and then dress them with any clothes you can imagine, or use a photo reference of a garment. Were still dealing with generative AI, so here are a few tips for getting the best results and troubleshooting successfully. Contrast in photos try to use photos with plenty of contrast for the AI to understand the context. Use the Keep Outlines mode this will preserve the shape of clothes. AI artifacts AI might occasionally create weird shapes or details. Simply generate a new photo or use the Photo Cleaner to fix any unwanted areas. Brushing area the brushed area doesnt need to be 100% accurate, because generative AI will blend in the colors. However if you need more accurate results, experiment with larger or smaller brush areas. Changing the color of your clothes doesnt need you to be a professor of digital arts with Pincel AI photo editor, its all about speed and instant results.. No artists or complicated software needed. Experiment with various colors and prompts for creative outcome. Just a few click and youre visualizing a new look or a completely new outfit. (Click on images for full size previews) Replace hoodie and pants Edit shirt and skirt color Replace multiple clothes Change hat color Replace color of jacket Change shirt color Yes, insMind's AI clothes color changer lets you easily recolor your clothes to your desired color combinations. It retains the original texture and fold to provide realistic recolored photos of clothes. Many e-commerce stores sell the same designs in multiple colors. Instead of photo shooting models for each piece of clothing, e-commerce stores can use an AI clothes color changer to generate multiple images with different colors. This saves time and reduces costs. In addition, they can also use the tool to test out design ideas before sampling. Yes, AI-powered clothes color changing is accurate and often ultra-realistic. For example, insMind uses advanced AI to intelligently detect fabric edges, lighting, folds, and texture. Afterward, it generates a natural-looking and high-quality recolored image. You can use insMind to recolor any kind of clothes, including shirts, skirts, dresses, pants, swimsuits, lingerie, jackets, uniforms, and more. It works effectively on a wide variety of fabric types and styles. Definitely! An AI-powered clothes color changer can identify and recover fabric areas with high precision. You can select the fabric area and then recolor it to match your desired color combination. Yes, insMind is a free online app to replace clothes color. You can upload your photo and recolor clothing without paying or installing any app.
