Este nuevo catálogo permite acceder de forma rápida y sencilla a toda la información clave sobre sus productos y soluciones, desde cualquier dispositivo y en cualquier momento. Además de las últimas innovaciones, incorpora contenido técnico detallado, lo que aporta un valor añadido para los profesionales. También se incluyen enlaces a herramientas y servicios adicionales relacionados con los productos de Schneider Electric.Principales novedades del Catálogo General 2024 de Schneider ElectricEste catálogo abarca una extensa gama de productos enfocados en mejorar la eficiencia y sostenibilidad en diferentes sectores como el residencial, industrial, terciario y en centros de datos. Algunas de las innovaciones más destacadas son:En el sector residencial y pequeño terciario:Wiser Home: una evolución del ecosistema Wiser, que ahora ofrece una gestión activa e integral de la energía en el hogar, permitiendo a los usuarios monitorizar y optimizar tanto la producción como el consumo de energía.Schneider Charge: una nueva estación de carga inteligente para vehículos eléctricos en viviendas unifamiliares, que puede ser controlada de forma remota mediante la app Wiser, facilitando la automatización y gestión energética de toda la vivienda.En cuanto a protección y control, la gama Resi9 introduce nuevos interruptores automáticos estrechos DPN, interruptores automáticos diferenciales combinados y una ampliación de los interruptores diferenciales de Tipo A.Además, Unica Deco es la nueva gama de marcos para mecanismos de la serie Unica, con un diseño moderno de líneas rectas y un atractivo efecto flotante, pensado tanto para el sentido visual como táctil.En dispositivos y sistemas de instalación:El SpaceLogic KNX Módulo Híbrido permite conectar fácilmente el controlador Wiser for KNX, integrando dispositivos Zigbee en una sola plataforma.También destaca la nueva pantalla táctil SpaceLogic KNX de 4", que facilita el control de cualquier estancia de manera intuitiva, combinando las funciones de un termostato, un pulsador y la simplicidad de un smartphone.Novedades en Aparatamento modular y soluciones de carga de vehículos eléctricosEn el ámbito de la aparatamento modular y la carga de vehículos eléctricos, Schneider Electric introduce soluciones innovadoras:EVlink Pro Pay: una solución personalizada de pago, capaz de gestionar hasta 10 puntos de carga y cumpliendo con la normativa AFIR.El nuevo cargador de corriente continua EVlink Pro DC, con potencias de entre 120kW y 180kW, que permite cargar un vehículo hasta un 80% en solo 20 minutos.Control y monitorización avanzadosLa serie de termostatos TC900, diseñada específicamente para edificios de oficinas, hoteles, aplicaciones hospitalarias y residenciales, destaca por su capacidad de control en sistemas de fancoil para aplicaciones de 2 o 4 tubos.Gestión energética inteligente con EcoStruxure™ Energy HubLa plataforma en la nube EcoStruxure™ Energy Hub es una herramienta ideal para la supervisión energética de instalaciones eléctricas. Esta solución permite la conexión de datos de múltiples ubicaciones mediante tecnología IoT, a través del servidor EcoStruxure Panel Server.Distribución de potencia mejoradaEn cuanto a distribución de potencia, Schneider Electric presenta la nueva generación de interruptores automáticos de caja moldeada, ComPact NS800 a 3200A, que abarcan desde 800 hasta 3200A. Estos dispositivos ofrecen un diseño renovado y mejoran la conectividad gracias a nuevos auxiliares inalámbricos.Nuevas soluciones en envoltentes universalesEl nuevo PanelSet SFN es una generación de envoltentes fabricados en acero descarbonizado, pensados para grandes cuadros eléctricos, automatización, control industrial y distribución eléctrica. Además, Schneider Electric amplía su oferta con armarios y envoltentes de hasta 125A, migrando de la gama Pragma a PrismaSet XS, manteniendo la robustez y el espacio de cableado que caracteriza a Pragma, ahora con un diseño en color RAL 9003 y funciones adicionales.Automatización y control: TeSys, 100 años de liderazgoEl catálogo incluye una amplia gama de productos de automatización y control, entre los que sobresale la icónica gama TeSys, que celebra 100 años liderando la gestión de motores. Su éxito radica en su capacidad para mejorar la eficiencia, fiabilidad y en la reducción de emisiones de CO2, contribuyendo al compromiso con la sostenibilidad.Meritxell Arús sobre la nueva edición del catálogo de Schneider ElectricMeritxell Arús, Directora de Marketing y Comunicación en Schneider Electric Iberia, comenta: "Después de meses de trabajo, tenemos ya preparada una nueva edición del Catálogo de Schneider Electric donde los profesionales del sector eléctrico podrán encontrar todas nuestras novedades -muchísimas-, pero también nuestras principales referencias estructuradas de forma sencilla. Este año además hemos continuado implementando mejoras tecnológicas para que la búsqueda de la información sea más rápida, para que en un solo click puedan acceder a todos los recursos que necesitan, hacer su cesta de productos y un larguísimo etcétera para contribuir a facilitar el día a día de nuestros clientes y ayudarles a ser más eficientes y ofrecer un mejor servicio a sus clientes. El año pasado recibimos más de un millón de visitas, por lo que estamos muy agradecidos por la confianza depositada en nosotros."El Catálogo General Interactivo 2024 ya está disponible online y los usuarios pueden acceder a él en cualquier momento a través del siguiente enlace. Uno de los proveedores más destacados de Senasa Servicios Eléctricos, Schneider Electric, ha presentado recientemente su amplio catálogo general interactivo 2024. Los clientes de la firma internacional y de Senasa Servicios Eléctricos podrán conocer de manera muy práctica y atractiva todas las soluciones de su portfolio, indistintamente del área a la que pertenezca. El catálogo, que cuenta con más de 1.000 páginas, engloba soluciones de todas estas áreas: Residencial y pequeño terciario; Dispositivos y sistemas de instalación; Aparatamento modular y carga de vehículo eléctrico; Control y monitorización; Gestión Energética; Distribución de Potencia; y Envoltentes Universales. El documento, que consigue despertar siempre gran notoriedad en el sector, consiguió acumular en la pasada edición más de 1.000.000 de visitas. Desde Schneider Electric, su directora de Marketing y Comunicación, Meritxell Arús, destacaba que «después de meses de trabajo, tenemos ya preparada una nueva edición del Catálogo de Schneider Electric donde los profesionales del sector eléctrico podrán encontrar todas nuestras novedades pero también nuestras principales referencias estructuradas de forma sencilla”. En Senasa Servicios Eléctricos también nos hemos hecho eco de este lanzamiento y lo compartimos con todos vosotros con la intención de que podáis descubrir todas las soluciones que os pueden ayudar en nuestros proyectos diarios. Conviene destacar que Senasa Servicios Eléctricos son partners desde hace años ya, e incluso cuenta con el prestigioso sello Alliance Certified Industrial Automation Distributor. Este reconocimiento acredita al distribuidor de material eléctrico castellonense como experto en el campo de la automatización industrial, algo que, sin duda, es toda una garantía para los clientes. El catálogo ya puede consultarse haciendo click AQUÍ. Schneider Electric debuted its complete smart home energy ecosystem at CES 2023 and was awarded a CES 2023 Innovation Award for the app that brings it all together: When fully deployed, Schneider Home can save you money on energy, maximize your home's efficiency and even provide a little peace of mind, the company said.Schneider Home is one of the most complete smart home energy management systems on the market. You can think of it like a smart home ecosystem. Instead of asking Alexa to order more toilet paper or having Google put your smart locks on a schedule, Schneider Home can schedule your energy use and give you remote control at the breaker and outlet level. While there is often some overlap between current smart home systems (for example, a smart speaker might turn off your lights) and other energy management systems (your solar company's app might monitor your battery's charge and discharge schedules), Schneider Home aims to bring whole-home energy management into one system.Smart management for an electrified homeThe Schneider Home system includes a backup battery, solar inverter, smart electrical panel, electric vehicle charger and smart light switches and sockets, which can be purchased all at once or installed piecemeal and will become available throughout 2023. It can all be controlled from the Schneider Home app.As natural gas (and electricity) gets more expensive and Inflation Reduction Act incentives for electrification kick in for 2023, greater control of one's electricity usage can save people money over time, especially as they switch from gas vehicles and appliances to electric ones.Schneider Home should be able to help you save in a number of ways. For example, electric vehicle owners will be able to schedule when their cars charge, limit it to when electricity rates are cheapest, or to charge their cars directly from solar panels. And the more forgetful among us will be able to remotely shut off lights and devices individually at the outlet or switch level, or in groups at the breaker level. Schneider Home also lets you establish an Away Mode: a preset that turns off breakers, switches and outlets that control nonessential devices like televisions and other energy vampires, as well as potentially dangerous devices like stoves while you're out of the house. As people swap gas-powered items like vehicles or stoves for electric ones, they'll use more electricity. Schneider Home might be able to keep homeowners from exceeding usage limits that might bump them into a higher rate. Schneider representatives said.Schneider Home looks like it could make it easier to balance your energy needs and lifestyle with the rising costs of energy. This product has been selected as one of the best products of CES 2023. Check out the other Best of CES 2023 award winners. La nueva versión del catálogo general 2024 de la compañía Schneider Electric, en formato digital e interactivo, ofrece un acceso online, rápido y fácil a la información clave de todas las soluciones y productos de la empresa, desde cualquier dispositivo y en cualquier momento. El documento incluye una amplia gama de productos diseñados para optimizar la eficiencia y la sostenibilidad en diversos entornos, como el residencial, el industrial, el terciario y los centros de datos. El catálogo general interactivo de Schneider Electric incluye una amplia gama de productos diseñados para optimizar la eficiencia y la sostenibilidad en diversos entornos. El catálogo interactivo integra también contenidos técnicos que añaden más valor a los profesionales, así como enlaces a contenidos adicionales y herramientas y servicios relacionados con los productos de Schneider Electric. Sector residencial y pequeño terciario En el sector residencial y pequeño terciario destaca la solución Wiser Home, una nueva evolución del ecosistema Wiser, que se convierte en un sistema integral de gestión activa de la energía en el hogar, permitiendo a los usuarios monitorizar y optimizar la producción y el consumo de energía. Asimismo, se incluye el nuevo cargador de vehículo eléctrico para viviendas unifamiliares, Schneider Charge, una estación de carga inteligente para vehículos eléctricos que se puede operar de forma remota mediante la aplicación Wiser para una automatización y gestión de la energía de todo el hogar. En cuanto a protección y control, la gama Resi9 incorpora nuevos interruptores automáticos estrechos DPN, interruptores automáticos diferenciales combinados y la ampliación de interruptores diferenciales de Tipo A. Destaca también Unica Deco, la nueva gama de marcos para mecanismos de Unica, que cuenta con una estética moderna, de líneas rectas y efecto flotante, que juega tanto con la vista como con el tacto. Dispositivos de instalación, monitorización y control En el catálogo se incluye un apartado de dispositivos y sistemas de instalación como el módulo híbrido SpaceLogic KNX que permite conectar el controlador Wiser for KNX de manera sencilla, integrando dispositivos Zigbee en una única plataforma. Asimismo, destaca la nueva pantalla táctil KNX SpaceLogic 4", que permite controlar cualquier estancia de forma sencilla e intuitiva, combinando la funcionalidad de un termostato, la versatilidad de un pulsador y la facilidad de uso de un smartphone. Schneider Electric ofrece a través de este catálogo un apartado para la aparatamento modular y la carga de vehículo eléctrico, como EVlink Pro Pay, una solución de pago ad hoc que puede administrar hasta 10 puntos de carga y cumple con la regulación AFIR; y el nuevo cargador de corriente continua EVlink Pro DC, de 120kW a 180kW, que permite a los vehículos alcanzar el 80% de carga en tan sólo 20 minutos. Para el control y la monitorización, la compañía cuenta con la nueva serie TC900 de termostatos fancoil, diseñada para edificios de oficinas, hoteles, aplicaciones hospitalarias y residenciales, para aplicaciones de dos o cuatro tubos. Gestión energética En el apartado de gestión energética destaca la plataforma en la nube EcoStruxure Energy Hub que habilita la conexión de los datos de uno o varios emplazamientos a través de tecnología IoT con la pasarela EcoStruxure Panel Server. Con respecto a la sección de Distribución de Potencia, Schneider Electric tiene ComPact NS800, la nueva generación de interruptores automáticos de caja moldeada que cubre desde 800 a 3200 A, presentando un diseño innovador y una mayor conectividad con nuevos auxiliares inalámbricos. La compañía añade su gama de armarios y envoltentes de hasta 125 A, pasando de Pragma a PrismaSet XS, que sigue la línea de solidez, diseño y espacio para cableado de Pragma; además del nuevo color RAL 9003, ahora se incorporan más funciones. Cabe resaltar que el catálogo incluye todos los productos clave de cada categoría, como los de automatización y control y de Infraestructura IT, entre los que destaca la gama TeSys, que cumple 100 años como líder en gestión de motores, por su aportación en eficiencia, fiabilidad, y reducción de emisiones directas e indirectas de CO2, contribuyendo a la sostenibilidad. Delegación de San Pedro: C/ Coín, 4, 29670 San Pedro Alcántara, Málaga, Delegación de Estepona: C/ Graham Bell, 34, 29680 Estepona, Málaga, Delegación de Marbella: C/ Juanar, 1, 29601 Marbella, Málaga, Delegación de los Barrios: C/ Mar Mediterráneo, 4, 11379 Palmones, Cádiz. ©2025 por Diego Diaz López, S.L. El manual de Schneider, dividido en 6 tomos, es esencial para ampliar información o bien como consulta en todo lo relacionado con las instalaciones eléctricas de baja tensión. El Manual expone, en sus diferentes volúmenes, las tecnologías y prescripciones más actualizadas para las instalaciones eléctricas. La construcción de la colección se apoya en muchísimos ejemplos ilustrados, gráficos, tablas técnicas y de formulación, para que se puedan estudiar ejemplos prácticos y a la vez extrapolarlos a otros casos reales que precisan la aparatamento de protección. Guía 1: Manual instalaciones eléctricas de BT Presentación Generalidades, La acometida en Baja Tensión, La compensación de la energía reactiva. Guía 2: Manual instalaciones eléctricas de BT La protección contra los choques eléctricos Los circuitos y su dimensionado La aparatamento de protección. Guía 3: Manual instalaciones eléctricas de BT La aparatamenta y sus aplicaciones particulares. Guía 4: Manual instalaciones eléctricas de BT El control energético de los edificios domésticos e industriales. Guía 5.1: Manual instalaciones eléctricas de BT Las instalaciones domésticas e industriales. Guía 5.2: Manual instalaciones eléctricas de BT Las instalaciones domésticas e industriales. With this guide, you will gain in efficiency, while ensuring for your customers a greater reliability and durability of installations and enabling them to address their sustainability challenges. Spoiler Alert: Explore the new features, including #MasterPact MTZ Active and #BSCM Modbus SL/UPL. Download the Smart Panel Assembly Guide here: 4,847,097 followers 3d Why are semiconductor companies investing in operational efficiency? In the race to produce the smallest, most sophisticated chips, semiconductor manufacturers are turning to operational efficiency as the key to maintaining their competitive edge. Using innovative solutions, industry leaders are enhancing fab operations, enabling continuous optimization while ensuring maximum production uptime. The impact goes beyond reliability—manufacturers achieve 20% cost savings on energy and materials through maintenance programs, 15% increased tool availability, and accelerated time-to-market that keeps them ahead of competitors. Discover how we are amplifying efficiency in semiconductor manufacturing. #Innovation #Technology Share — copy and redistribute the material in any medium or format for any purpose, even commercially.
