Gmail has always had strong security as a foundation. We work hard to protect you from spam, phishing, and malware, before they reach your inbox. Our AI-enhanced spam-filtering capabilities block nearly 10 million spam emails every minute. No. While you may see ads in your no-cost Gmail account, your emails are private. Google does not scan or process Gmail content for advertising purposes. While Gmails features are secure enough for most users, some accounts may require additional layers of safety. Google's Advanced Protection Program safeguards users with high visibility and sensitive information, who are at risk of targeted online attacks. Learn more Gmail is part of Google Workspace where you can choose from different plans. In addition to what you love about Gmail, you get a custom email address (@yourcompany.com), unlimited group email addresses, 99.9% guaranteed uptime, twice the storage of personal Gmail, zero ads, 24/7 support, Google Workspace Sync for Microsoft Outlook, and more. Learn more Browse tips and step-by-step guides made for both new users and power users.Help Center Download Article Use gmail.com or the Gmail app to log in Download Article Do you need to sign into your Gmail account? If you have a Google account, you can access Gmail from login easily. Otherwise, you can directly use the Gmail website or app to sign into Gmail. Here's how to log in to Gmail using your computer, iPhone, or Android device. To log directly into Gmail, go to the Gmail website on your computer. Enter your Google email and click Next. Then enter your password and click Next. Alternatively, sign into the Google website and click Gmail to access Gmail from login. 1Open the Gmail login website in your browser. This method will work on any computer, including your PC, Mac, or Chromebook. You can use any web browser, such as Chrome, Safari, or Firefox, to sign in to Gmail.[1]If an inbox automatically opens after visiting the website, click the profile icon in the top-right corner, then click Sign out.[2]Click Use another account if you see a list of saved accounts. You can also remove a saved account by clicking Remove an account then the minus symbol to the right of the email.[3]You can also use the regular Google website to log into Gmail. Go to the Google website, click Sign in, and enter your login information. Once you're on the homepage, click Gmail in the top-right corner. 2Enter your Gmail email address. In the text field that appears, type in your Gmail email address.If you don't have a Gmail account, you can make a new one by clicking Create account. Advertisement 3Click Next. It's below the text box.4Enter your Gmail account password. Type in the password you use to log into your Gmail account.Click the eye icon to toggle the password visibility.If you don't remember your password, you'll need to reset or recover it. Click Forgot password? to begin the process.5Click Next. It's below the password text box.6Wait for your Gmail inbox to load. This should take only a few seconds.If you have two-factor authentication turned on, you'll need to follow the on-screen instructions to verify your device.You'll now be able to use Gmail.7Add another account (optional). If you want to sign into another Gmail account without signing out of your current one, click your profile picture in the top-right corner.[4]Click Add account, and then repeat the sign-in process.If you want to link an email address from another provider, you can add an account to your Gmail. Advertisement 1Sign into Gmail when setting up your Android. Since Android phones and tablets use Google Accounts as your default sign-in method, you'll need to sign into Gmail when initially setting up your Android. This also means that, while you can add extra accounts to Gmail on your Android, you can't sign in and out of your primary account without factory-resetting your Android.To set up your Android, turn it on. Enter your Gmail address when prompted. Tap Next, then enter your Gmail password. Tap Next. Follow any additional on-screen instructions.2Open the Gmail app. This looks like a multicolored M. This will open your default Google Account's Gmail inbox.3Tap your profile picture. You can find this at the top-right corner of the screen.[5]A pop-up window will open.4Tap Add another account. This will be below your current Google account.[6]5Tap Google. Google's Sign In page will open within the app.6Enter your email and tap Next. If you forgot your email, you can tap Forgot email? below the field to start the process of finding it.7Enter your password and tap Next. You can check the Show password box to toggle the password's visibility.You'll need to agree to Google's Terms of Service.8Tap I agree when prompted. Doing so will take you to your Gmail inbox, which should load after a few seconds.You can now send emails using your added email address. Advertisement 1Open the Gmail app. This looks like a multicolored M. [7]Gmail is available for iOS in the App Store.2Tap Sign In. This is at the very bottom of the screen.If you're already logged into an account, tap the profile picture in the top-right corner, then tap Add another account.3Tap Google. If you have another email provider you want to link, you can tap their name.A pop-up window will open.4Tap Continue. Google's Sign In page will open within the app.5Enter your email and tap Next. If you forgot your email, you can tap Forgot email? below the field to start the process of finding it.6Enter your password and tap Next. You can check the Show password box to toggle the password's visibility.7Wait for Gmail to load. This should take only a few seconds.If you have two-factor authentication turned on, you'll need to follow the on-screen instructions to verify your device.If you want to sign into another Gmail account without signing out of your current one, tap your profile picture in the top-right corner, then Add another account. Repeat the sign-in process.[8] Advertisement 1Open the Settings app on your iPhone or iPad. Tap the Settings app icon, which resembles a grey box with gears on it.[9]2Tap Apps. If you have an older version of iOS, skip this step.3Tap Mail. You may need to scroll to find this. It's next to an icon of a white envelope with a blue background.[10]4Tap Mail Accounts. This is near the top of the page.5Tap Add Account. If you have existing emails linked to the Mail app, you'll see them listed under the Accounts header.[11]6Tap Google. This is in the middle of the page.Google's Sign In page will open within the app.7Enter your Gmail email address and tap Next. In the text field that appears, type in the email address for your Gmail account.8Enter your Gmail account password and tap Next. Type in the password you use to log into Gmail.You can check the Show password box to toggle the password's visibility.If you have two-factor authentication turned on, you'll need to follow the on-screen instructions to verify your device.9Select features to sync. Tap the white switch next to an option (e.g., "Notes") to turn it on for this email account, or tap the green switch next to an option to turn it off.10Tap Save. It's in the top-right corner of the screen. Doing so will save your changes and add the Gmail account to your iPhone's Mail app.You can now find your Gmail inbox in your device's Mail app on the Inboxes page. Advertisement Add New Question Question I can't log into my gmail account, it keeps telling me the connection is untrusted. You should be able to bypass this screen (there might be an advanced options link or something similar that will allow you to continue). If this doesn't work, it's a problem in your security settings, and you either need to troubleshoot it or possibly use a different browser. Question I use an iOS phone and I deleted my account from my mail. How can I recover it? You'll want to go to "Mail" in Settings and add a new account. Pick whether your account is through Google, Outlook/Hotmail, or another, and follow the instructions to add your email account. Question I lost my phone. I cannot remember my password for my Gmail account. Is there another way to retrieve my password? You can click on the forgot password option and use your alternative email/phone number to get back access to your account after changing your password. From your profile picture, you can also easily sign in, sign out, or turn on Incognito mode. When it comes to privacy, we know one size doesn't fit all. That's why every Google Account comes with easy-to-use controls and tools like Privacy Checkup so you can choose the privacy settings that are right for you. You can also control what data is saved in your account with easy on/off controls, and even delete your data by date, product, and topic. Your Google Account gives you a safe, central place to store your personal information like credit cards, passwords, and contacts so its always available for you across the internet when you need it. If you use Gmail, you already have a Google Account. With a Google Account, you have access to Google products at no charge like Drive, Docs, Calendar, and more. To sign in to your Google Account (or any Google product): Go to the sign in page of the product (for Google Accounts it is myaccount.google.com). Enter your Gmail username (everything that appears before '@gmail.com'). Enter your password. Add Gmail to an existing Google Account If you add Gmail to your Google Account, your account's primary username permanently changes to yourusername@gmail.com. After you add Gmail, the original email address associated with your account becomes your alternate email address. If you verify your original email address before you add Gmail, you can sign in with this email address. To add Gmail to your Google Account: Go to mail.google.com. Fill out the form. Click Submit. To verify your account, follow the instructions. Tip: If you use Sign in with Google or Chrome Remote Desktop and you change your primary email address, you may experience issues. Learn about issues with primary email address change. Common issuesI don't think I have a Gmail account New Google Accounts come with Gmail, so you should already have a Gmail address if you've created your account recently. If you never created a Gmail account, you can sign up at no charge. To create a Gmail account: Go to Gmail.com. Select More options Create an account. Follow the onscreen instructions. I think I deleted my Gmail account If you already have a Google Account and deleted your Gmail account, you can add Gmail to your current Google Account. To add Gmail: Go to mail.google.com. Sign in to your Google Account. Follow the onscreen information to add Gmail to your account. When you add Gmail, your Gmail address will become the primary username on your account. It will be what others see when you share information, such as documents or photos, from your Google Account. Your original email address will become the recovery address on your account. If you have more questions, visit the Gmail Help Center. Post to the help community Get answers from community members This story is available exclusively to Business Insider subscribers. Become an Insider and start reading now. You can log into your Gmail, and enable Gmail automatic logins, on the app or website. If you logged out of Gmail, signing back into your account is easy if you know your password. Make sure to log out of your Gmail when using shared or public computers for security. Gmail makes it easy to not only access your emails, but also connect to other Google services, such as Google Docs, Google Drive, Google Calendar, and so on. What's even better is that you can perform actions, like adding an event to your Calendar or sharing a Google Doc, using your Gmail account. But before you can do any of that, you need to log into Gmail here's how. How to log into your Gmail account on a mobile device On your phone, you're usually automatically signed into Gmail. However, if you've logged out or deleted the app, here's how to log back in. 1. Download and open the Gmail app on your iOS or Android device. 2. Tap the Sign in button at the bottom of your screen. If you already have an email account linked in the app and want to add another account, simply tap your profile icon in the top-right corner and then tap Add another account. Tap "Add another account." Isabella Paoletto/Insider 3. On the next page, tap Google. You can also connect other types of email accounts to your Gmail app. Isabella Paoletto/Insider 4. Tap Continue to allow Google to sign into your account. Tap "Continue." Isabella Paoletto/Insider 5. Follow the steps to log in. Enter your email or phone number and click "Next." Isabella Paoletto/Insider You can check the box next to "Remember me" to stay logged into your Gmail account on your device. How to log into your Gmail account on a computer To log into Gmail on your Mac or PC, simply go to Gmail.com and enter your account email (or associated phone number) when prompted, and enter your password. Check the box next to "Remember me" if you'd like to stay logged in automatically. Enter your password and select "Next." Isabella Paoletto/Insider And if you're logging in on a public or shared device, don't forget to log out of Gmail when you're done for the day.
